Long-Pending Legislation Places New Obligations on Out-of-Network Providers

Major changes in New Jersey by passing the Out-of-Network Consumer Protection, Transparency, Cost Containment and Accountability Act

On June 1st, New Jersey Governor Phil Murphy signed into law the Out-of-Network Consumer Protection, Transparency, Cost Containment and Accountability Act (the "Act") affecting healthcare facilities, medical practitioners and health insurance providers. This act places responsibility on healthcare providers to notify patients about services they will provide, and is designed to protect patients from surprise out-of-network healthcare charges.

There are many specific measures laid out in this law. [Click here](#) to read the key takeaways as listed directly in Assembly Bill No. 2039 from the New Jersey Legislature website.

Needless to say, the immense detail in this new law will bring hefty changes for healthcare facilities, as well as their providers. Concerned about how this may affect your organization? Our CG Healthcare Experts are here to help you analyze the best methods to move forward. [Contact Mike Lewis, MBA, FACMPE and Deb Mathis, CPA, CHBC today.](#)
